Don't wait six months or more for a contractor to build your home when you can own this and just move in. It has 12 PV units and on net metering with MECO. There is a large covered patio of approx. 560 sf. on the side of the house for BBQing or be turned into addition living space. The kids can walk to their school which is close by. Additional parking on the right side of the carport. It has been awhile for a property to be available in Lahaina and maybe longer for the next property to come on the market.
